

1. Antivirus software. You will have to show me that the computer you are using for this course is equipped with an updated antivirus software. This can be done by capturing a screenshot of the About screen of the software. If your computer is already running an AntiVirus software just capture the screenshot as explained below. Otherwise you will have to first install it. Explanation and suggestion are also available below.

2. Choice for a UPS capable to support the switch and the Firewall for at least 30 minutes during power fail, with extra power for at least 50% expansion:
